WHOLESALE PRICE LIST — 1933

LaBars' Rhododendron Nursery
STROUDSBURG, PA.

If You Want Sales — Give Quality

A few years ago customers were not greatly concerned about price and quality. A plant was a plant whether carelessly produced by unskilled workers or grown into a specimen by skilled nurserymen.

Times have changed. Volume sales made in prior years have taught the public that there is quality in plants, as in all things, and they now realize that the cheapest plant is not always the greatest bargain.

Today, more than ever, customers are looking for bargains but **QUALITY IS BEGINNING TO COUNT**. Price alone cannot sell merchandise—quality must be considered and value given for value received. More sales will result by giving the best at a reasonable price than by selling the poorest at the lowest price.

Of price cutting there can be no end and we have no desire to enter into it. We sincerely believe that our plants are priced right when our quality is considered, and that at the prices quoted you can handle our plants at a profit to yourself and satisfaction to your customers.

All nursery grown plants herein are shipped balled and burlapped and prices are quoted F. O. B. shipping point. Truck deliveries of the material from Stroudsburg within a radius of 125 miles at reasonable prices.

Wholesale Price List —

Our plants are actually nursery-grown and have been transplanted within the past plants which have been transplanted in a nursery for a season or two. Increase your busi
